Dear Glenn:

I want to thank you for being so kind as to introduce me to the eye drops that reduce or cure cataracts. As you know I was schedule in July of 2005 to have cataract surgery on both eyes. We suspect that the cataracts were caused by the trauma of my PRK Laser surgery several years ago.

After taking the drops three times per day for almost two months I went for my pre-op check up and my eye surgeon stated that the cataract was down to trace in my right eye and reduced by 60% in my left eye! Therefore he canceled the surgery and advised me to continue the drops.

I want to thank you again for the opportunity, and for saving me the trauma of going through this type of eye surgery. Dr. Roy Bartlett asked for your phone number and I gladly provided it. He is anxious to hear more about your wonderful product.

Sincerely,

Donald R. Smith, ChFC
