## Oculovet Special Offer:

I picked up my first bottle of Oculovet at the NAVC to try on my own puppy who had developed juvenile cataracts by 6 months of age. Although his vision was severely limited, his attitude was always positive and exuberant. After using the drops, he began to climb the stairs again and no longer hit the walls or furniture when chasing his best friend, the cat. Also, the cat could no longer easily hide from him by just stepping on the other side of the couch. I was very glad that I found a product that has allowed him to once again gain the most fun and enjoyment out of his youth.

Thanks Oculovet.
