To Whom It May Concern :

This letter is in regards to "Howard" Goblentz, a 10 y.o. neutered male chocolate Labrador Retriever. "Howard" has several health concerns, one of which is diabetes mellitus. He has secondary cataracts and corneal scarring due to his diabetes. We started "Howard" on Ocluvet nutritional eye drops at least 1.5 years ago. His owners are very pleased and have noticed clearer eyes. As his veterinary team we have noticed a slowing in the progression of his cataracts and corneal scarring. He will continue on these drops for life.

Thank You,  
Dr. Kerri McLaughlin & staff
