

OcluVet Clinical Trial Follow-Up Form  
Pet Owner Evaluation and Feedback

Dr. Roy Dimon

Owner First Name: \_\_\_\_\_ Last Name: W

Pet's Name: Hogan Species: dog Breed: cocker Age: 8  
(dog/cat/bird/other)

Initial start date in clinical trial: \_\_\_\_\_  
(Month) (Day) (Year) this part spring - can not sure of the date  
now

Owner observation of animal ~~posttreatment~~ (please provide your comments):

Eye appearance it's hard for me to tell - less white in center  
Pet's visual capacity Hogan seems much improved. He can see other dogs from our window! He also can find his toys and likes his walks more  
Pet's navigational skills (playfulness, ability to follow movements, catch treats, use stairs, etc) much improved

pretreatment  
Owner observation of animal ~~post 3 week treatment~~ (please provide your comments):

Eye appearance dull, white in the center  
Pet's visual capacity couldn't find his toys - fell in the pool, walked into things  
Pet's navigational skills (playfulness, ability to follow movements, catch treats, use stairs, etc) didn't like to play or go on his walks.

Maintenance dosing observations and additional comments as of: \_\_\_\_\_

Eye appearance 1 in each eye once a day  
Pet's visual capacity \_\_\_\_\_

Pet's navigational skills (playfulness, ability to follow movements, catch treats, use stairs, etc) \_\_\_\_\_
