

02-06-06

D.R. Flintstrom,

I am sending you a copy of the 2 Rabie
certificates. One for Ladybugs and one for Micky

Also I have sent you a picture of Mickey's
eyes taken today but you can see the date is on
the picture. You can see the Blue in his eye again
and the Brown one looks much clearer too.

Would it be possible for me to bring him back
for you to look at again next week before I call
down in Harvard. I know he sees better now
than he did when you saw him. I think the med.
is really helping and I'd like your opinion before
I go down there - you already told me they would
tell me the med. would not work.

My son throws a ball for him in the evening
and Sunday Night he ran over and got it every
time but one. When I brought him to you on Friday
he had no idea where the ball went.

Let me know what you think? If you let me
bring him next week I really think you'll see an
improvement.

Betty Pellerin
