Theresa asked me to scan and send you this photo that she would like you to use. Theresa introduced me to Ocluvet and I have been using it on my seven year old border collie Nevi, who had early lenticular sclerosis. Nevi has placed twice in ESPN's Great Outdoor Games and is also a National Champion frisbee dog whom I love dearly. I have been a Veterinarian Technician for 16 years and have had the head Veterinarian at my clinic monitoring Nevi's eyes during her use of Ocluvet and we've been very impressed with the results. Thankyou for a wonderful product!
