Re: OcluVet

To Whom It May Concern:

My 12 year old cat, Wiley, became completely blind from cataracts about three years ago. The cataracts were diagnosed when he was six months old. Wiley was recently prescribed OcluVet eye drops. To my amazement, after five days he began to see close objects, first in a darkened room. He navigates with more confidence. I feel he is happier because he is becoming more social able and playful. OcluVet has made an immediate improvement in Wiley's eyesight and temperament, and I highly recommend this product.

Very truly yours,

Sandra Behmke
